

Women's Health Clinic

402-232-2273, ext. 342

- Gynecology

Patients may be treated in the clinic by referral from PCM , or in same day/next day openings if space is available.

The Women's Health Clinic provides quality nursing care to eligible women (adolescent to geriatric) throughout the childbearing and menopausal cycle. We strive to teach our patients and their families' positive health practices through an understanding of available community and facility resources. We provide preventive health care and the maintenance of a healthy life style in an organized, safe, and caring environment. Care includes, but is not limited to:

- Cancer screening
- Dysplasia treatment
- Sexually Transmitted Infection Treatment
- Mammography Referrals
- OB/GYN preventive medicine
- Patient/family education
- Patient/family OB/GYN concerns
- Infertility Work-ups
- Birth Control Counseling

Women with a positive home pregnancy test or more than one week late for their cycle can walk-in to the laboratory on the ground floor for a pregnancy test – no referral is needed from the clinic. Results will be received by PCM team, & patients will receive a call with results from their nurse. If active duty, notify public health within 24 hours of positive result. At the time of notification- your PCMs nurse will place a referral to WHC & order the prenatal vitamins. You may then book the OB orientation class.

- OB

OB Orientation – Group orientation held every Tuesday at 0900 in the third floor classroom at the Clinic. This class is required for Active Duty patients and highly encouraged for all others and new OB patients arriving to Offutt. You must schedule this class through the appointment line or Women's Health Clinic. This class is to inform you of the OB care and services provided by the 55th Medical Group and our community partners, and to give you the information you need to decide if you wish to be assigned to either the Pink Team (Women's Health) or the Blue Team (Family Medicine) to follow your care throughout your pregnancy.
